6. Copy link pada Option 2

How to add this Buy button to your website

Add the Buy button for this article on your website by copy/pasting the HTML code below (option 1) or link your own widget to the Buy button (option 2). When customers click on the Buy button, they will be taken to their shopping cart. Here they can proceed to the checkout page or continue shopping.

Are you using Wix? In the Wix Website Editor, add a button and link the button to the URL of the Buy button (see option 2). Do not embed the HTML code of the Buy button in Wix using option 1. This method does not work in Wix for technical reasons.

Option 1 - Copy the following HTML code for the Buy button just as you would copy a text and then in your website admin, paste it in the article detail page:

```
<a href="https://id.penworldwide.org/buybuttons/id01001/btn/4542a202-9616-43ae-b151-d3b96f7f4c4d/"><button>Buy</button></a>
```

Option 2 - If you only need the link to the Buy button because you are using your own widget, e.g. button, then copy the following URL (Web Address):

```
https://id.penworldwide.org/buybuttons/id01001/btn/4542a202-9616-43ae-b151-d3b96f7f4c4d/
```

Copy link ini (option 2)

After adding the Buy button to your website, please make sure that the Buy button works by testing it. To test the Buy button: click on the Buy button just like a customer would. You should be taken to the Shopping Cart page.

Trouble-shooting a non-working Buy button ("Page not found" error message):

Check that the HTML code on your website is the same as the HTML code (option 1) displayed above, especially the string enclosed in double quotes after *href*. If you are using your own widget linked to the URL of the Buy button (option 2): verify that the link of your widget matches the URL of the Buy button.
