

**TASK 2: CONNECTING WEBSITE TO STORE MANAGER**

**Objective**

Students are able to:

- Learn about website to Store Manager connection

**Introduction**

Store Manager is a feature provided in VCI Portal to connect the company’s website to Company’s Bank. This feature allows consumer to purchase goods on the website, and directly pay through Store Manager.

**Instrument and Material Preparation**

- Laptop/ Computer
- Internet connection

**Activities**

No	Activities	Duration
1	VP and department staffs learn about store manager feature, required information and how to run it. Follow the instructions of Store Manager Use in the portal. Try the other company’s store manager function within the network by purchasing one of its products.	20’
2	Make sure that the company’s website already meets the requirements of store manager connection, which are: <ul style="list-style-type: none"> <li>▪ Description of each product/service</li> <li>▪ Product price</li> <li>▪ Buy button</li> </ul>	10’
3	<ul style="list-style-type: none"> <li>▪ Register each of your company’s product in Store Manager, with its name, article number and price. Note: tax will be added to the price automatically when consumer purchases the product.</li> <li>▪ Creat link of each product/service registered in Store Manager. The name of such product/service should be similar with the one registered in Store Manager.</li> </ul>	60’
4	Ask several staffs to try to buy your company’s products so that you can figure out whether the link works appropriately.	10’

**Output**

- Well-functioned Store Manager connection
